Objective

To build a career in AWS Cloud and DevOps by applying my practical internship experience in cloud Computing, Linux, networking, and deployment. Seeking an opportunity to enhance my technical skills, work on real-world projects, and contribute to organizational success.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, S3, IAM, VPC, CloudWatch, ECR), Cloud Infrastructure, Security Groups
- **DevOps & CI/CD:** Git, GitHub, Docker (Basic), CI/CD Fundamentals,
- **Operating Systems:** Linux (Ubuntu), Windows, SSH, Linux Server Management
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, IP Addressing, Subnets, Routing, VPC Networking
- **Web Servers:** Apache, Nginx | **Scripting:** Basic Bash/Shell Scripting
- **Troubleshooting:** AWS Infrastructure, Linux Servers, Application Deployment, Basic Cloud Monitoring

INTERNSHIP EXPERIENCE

Intern Jr Pen tester| Axentechx solutions | **Aug 2025 – Jan 2026**

Found and reported security vulnerabilities in web applications

- Performed basic **VAPT testing** on **web** applications
- Identified common vulnerabilities (**SQL Injection, XSS**)
- Followed **OWASP** guidelines
- Prepared simple reports on security issues

Cloud & DevOps Intern

IT Root Private Limited, Pune | **Feb 2026 – Present**

- Worked with AWS services including EC2, S3, IAM, VPC, and CloudWatch.
- Deployed and managed Linux-based EC2 instances.
- Configured Security Groups and basic VPC networking.
- Managed IAM users, roles, and access policies.
- Deployed static websites using Amazon S3.
- Assisted with cloud infrastructure automation, deployment, monitoring, and troubleshooting.
- Used Git and Docker for development and deployment tasks.

PROJECT

CI/CD Pipeline for Application Deployment on AWS

- **Technologies:** AWS EC2, GitHub Actions, Docker, Git, Linux
- Built a CI/CD pipeline to automate application build and deployment.
- Containerized the application using Docker.
- Configured automated deployment to an AWS EC2 Linux server.
- Used GitHub Actions to automate the deployment workflow.

AWS Infrastructure Automation using Terraform

- **Technologies:** AWS, Terraform, VPC, EC2, IAM, Git
- Provisioned Cloud infrastructure using Terraform.
- Terraform for automation, Security Groups, and EC2 resources.
- Managed infrastructure using Infrastructure as Code and Ansible.
- Stored and managed Terraform configurations using GitHub.

Docker Application Deployment on AWS

- **Technologies:** Docker, AWS EC2, Amazon ECR, Linux, Git
- Containerized a web application using Docker.
- Built and managed Docker images for application deployment.
- Pushed container images to Amazon ECR.
- Deployed and managed the containerized application on AWS EC2.

Kubernetes Application Deployment

- **Technologies:** Docker, Kubernetes, AWS, Linux
- Deployed a containerized application using Kubernetes.
- Created Kubernetes Deployments and Services.

- Managed application containers and replicas.

EDUCATION

BSc. Computer Science Shivaji University Kolhapur 2026
